

Data Analyst/Engineer/Scientist – Lead Consultant

Hi! We're Telstra Purple 🟪

Our diverse team of digital experts, unrivalled global partnerships with leading tech companies, combined with the power of Telstra's advanced network and adaptive capabilities, means we can deliver digital transformation for Australian business in a way that other consultancies can't.

Our core beliefs:

- We thrive when our people thrive.
- Our customer's success is our success.
- We are trusted and empowered as individuals.
- We are stronger together.
- We continuously learn, share, and innovate.

About the work:

We solve real problems for the biggest clients in Western Australia, South Australia, and Northern Territory. We work in Health, Mining, Industry, Education, Commercial, and Government.

We will give you clear goals and timelines and support you to work agile, lean, and iteratively.

Our approaches are flexible by design. We have guides and support, but you are free to solve problems your own way. You will have the autonomy to create your own path and ways to solve problems and create amazing solutions. We also have a number of go-to-market offerings that make us a go-to partner for our customers.

The technology we work in is many and varied. One day you might build a report in Power BI, the next an ETL pipeline in AWS, or perhaps some Big Data IoT solution – the list goes on.

About you:

As a Lead Data Consultant, you will need to:

- Have ten (10) years worth of experience in Data Engineering, Analytics or Science.
- Be proficient in parts of data engineering, analytics or sciences. For example, you may have worked with building machine learning models, built a data platform or two on Microsoft Azure/ AWS, ingested Big Data, made some nifty ETL pipelines, or created many reports in Power BI.
- Have an automation first mindset. CI/CD tooling, scripting and DevOps is in your DNA.
- Help deliver innovative solutions for our clients.
- Demonstrate the Purple Beliefs.
- Work well in a team.
- Be coachable and pursue all opportunities to develop your skills and capabilities on engagements and in your professional development.
- Build a positive reputation for yourself and for Purple.

- Keep our customers and Purple stakeholders regularly informed of your work progress.

Technology stack:

Here is just some of the technology stack we work with and on for our customers:

- Azure DevOps and Git,
- Azure Data Factory, Purview and Synapse,
- AWS Glue/ LakeFormation,
- PowerBI,
- Azure Machine Learning,
- AWS SageMaker,
- AWS ElasticSearch,
- Google BigQuery,
- Databricks,
- SQL Server,
- Python, Spark, Jupyter, SQL and PowerShell
- All things IoT, including Digital Twins,
- Hadoop and other open-source platforms.

About the benefits:

- Flexible work hours and remote working opportunities.
- Free Telstra mobile phone and plan.
- Health Care for you and Family

About the culture:

We thrive when our people thrive, and that's why our Quokkas invest in several initiatives that make our place the best place to work.

- On Fridays, we invite a guest or internal speakers for Lunch and Learn sessions. We feed your mind and your belly.
- Initiatives Program where you can submit ideas. We give you the time and support to make magic happen.
- Mentor Program for role changes and skillset development.
- Plus, we provide you with a People Leader whose role is to support, empower, and encourage your career growth.
